## Annotated Bibliography

### **Source #1**

Bradford, Alina. "Turtle Facts." *LiveScience*. Purch, October 1, 2015,  
<https://www.livescience.com/52361-turtle-facts.html>. Accessed February 28, 2018.

### *Summary*

This website covers basic facts about turtles. It includes information on their shell, habitat, diet, etc. It gives some information on different species but is mostly about turtles in general.

### *Reflection*

This source will help me give background information on turtles. It does not give information on arguments for or against protecting turtles, but I can use it to explain things like where turtles are found and what they eat, which is important to explain why to protect them.

\*\*\*Note: Your annotated bibliography must include at least three sources!
